SUMMARY

Entrepreneurial player-coach with 20+ years across Product, Engineering and Business. Fluent with business and tech tradeoffs, and delivered value in Enterprise and Consumer markets. Built products across multi-sided marketplaces, logistics, data products, ML/optimizations, delivery ecosystems, eCommerce, forecasting, simulations, inventory, incentives, social networks, and media publishing. Customer advocate who elevates teams via consensus building, combining strategic vision with operational rigor and detailed execution. AI-enabled, data-fluent, patent holder with a growth mindset.

Google Generative AI Leader • Lean Belt Certification
Patent: Inventory • Patent: Last Mile Delivery • Publication: E2E Supply Chain Optimization

EXPERIENCE

Technical Product Innovation, Burlingame, CA
Product Lead & Architect, Sep 2025 – present

- Established a high-velocity R&D sandbox to architect "Force Multiplier" stacks using agentic workflows and GenAI; focused on 0-to-1 product development and complex third-party API orchestration.
- **SimpleStory.ai (Multimodal AI):** Engineered an AI-native publishing marketplace for educational content. Validated low-friction creator UX, resulting in successful MVP launch
- **TroveScore.com (Market Intelligence)**: Built an AI-powered inventory valuation tool that identifies all books in a single image, cross-references real-time market data (Google & eBay) to automate "sell vs. donate" decisions.
- **Full stack AI orchestration:**
  - Frameworks & Agents: Cursor AI, Claude Code, OpenClaw.
  - Infrastructure: Google Cloud (Run/Build/SQL/Storage), GitHub, Supabase.
  - Inference & Synthesis: Vertex AI, OpenRouter, Fal.ai, ElevenLabs.
  - Growth & Ops: PostHog, Umami, Stripe, Cloudflare.

WALMART TECH, Building tech platforms & retail solutions, San Francisco Bay Area, CA
Director of Product Management, 2019–Aug 2025

- Built a 0 to 1 B2B transportation marketplace to $250M ARR. Conceived and co-created the vision with cross-functional leaders. Led multi-team execution across GTM, CRM, onboard & retain carriers & shippers, demand matching, safety, fraud, and mobile app. Partnered with Salesforce, Quantum Metrics, Braze, JPMorgan, RMIS etc to accelerate launch. Optimized onboarding funnel for 3000 carriers; reduced activation from 90+ days to 1.
- Pioneered platform product approach by creating an end-to-end logistics Capability Matrix framework, enabling tech reuse and faster time to market, without compromising user experience. Adopted by other vertical leaders.
- Envisioned, built and launched a service-oriented platform for transportation management across five countries, delivering $50M+ in annual savings driven by reduced workflow frictions and best in class optimizations. Scaled a 10-PM team from ground up; delivered 100+ screens backed by centralized master data, EDI & API services, routing engines, maps and dashboards. 1000s of users across personas of Suppliers, Carriers, Stores, Drivers etc.
- Led last mile delivery routing optimization from 0 to 1 to N; powering 250M+ annual deliveries, achieving 20% fewer miles driven and outperforming Doordash / Uber in delivery fees – earning a patent. Chaired a Product Advisory Council across global markets, and influenced customer journeys on Checkout, Search and Walmart+.
- Led delivery store activations, online customer delivery scheduling services, and an innovative delivery eligibility algorithm that was used across multiple eComm products and Walmart+ with patent pending.
- Created bespoke simulation platform for Walmart's future supply chain, bolstering confidence in $5B+ infrastructure investments; presented to CEO John Furner. Concept to pilot in 6 months, focusing on immediate value creation.
- Built 0 to 1 tech for our first Sortation center, a last-mile delivery hub. Cut eComm delivery costs by 10% and reduced delivery time by 15%. I built the web tools for 3P Carriers and native iOS/Android apps for Drivers.

WALMART STORES & ECOMMERCE, San Francisco Bay Area, CA
Staff Product Manager, Forecasting, 2016–2019

- Launched eComm demand forecasting product incorporating item demand, promotions, item affinity, and price elasticity. Integrated a human-in-the-loop approach to drive adoption of early M/L algorithms among Merchants.
- Improved forecast accuracy 25% YoY through weighted m/l algorithms, data sanitization and addressing cold starts.
- Enhanced labor planning for Stores and Warehouses by delivering actionable insights via Tableau dashboards, and leading cross-functional huddles that converged non-systematic information with systematic data. Increased executive visibility, speeding decision-making, and enabling faster response to demand fluctuations.
- Developed Walmart's first SKU-Region demand allocator; improving in-stock rates by 20% YoY by optimizing inventory placement in the physically constrained network and shelf space

WALMART STORES & ECOMMERCE, San Francisco Bay Area, CA
Senior Business Manager, 2012–2016

- Led inventory flow planning for holiday peak season; presented recommendations to VP+ leaders across Merchandising, Transportation and Supply Planning on weekly basis. Improved on-time delivery +75% to plan.
- Instituted processes to improve Customer Order Fill Rates from under 90% to 95+% in 6 months for Store based fulfillment, increasing top line by $4M via increased throughput and improved modular planning at Stores.
- Defined and executed framework to curate 1M+ highest priority SKUs for eCommerce; modeled data sets across Walmart, Samsclub, and third-party market syndicates such as Nielsen and NPD; never done before at Walmart.
- Forged partnerships in new omni-channel org to improve in-stock rate by 15% across shared inventory in Stores.
- Facilitated eComm CEO's Weekly Business Reviews meetings. Coordinated wins & risks across leadership team.
- Proactively transitioned to Finance Manager role to address urgent need; owned P&L for $70M cost center.

OTHER EXPERIENCES IN STARTUP & TECH CONSULTING

2006-2010, AGILE MILE (Formerly NuRide - early-stage startup focused on combining social networks with traffic demand management), Virginia and Connecticut, **Lead Product Manager and full stack Developer**. Created strategy with CEO and built the multi-sided marketplace. During 2008 financial crisis we reduced headcount by 70%, I led tech driven turnaround by transitioning infra to the cloud (early adopter of Amazon AWS) to cut costs and scaling to 4x users; enabling a 2x ARR impact. Developed targeted marketing using geo-spatial customer segmentation, and behavioral analytics. Partnered with state government officials and closely coordinated with Sales team to launch 300+ marketing campaigns, including large clients such as Dunkin Donuts & Progressive.

2002-2006, INFOSYS TECHNOLOGIES LTD., Ohio and Texas, **Software Engineer**. Streamlined enterprise-wide **assessments creation workflows for Pearsons Education**, and built next-gen **unified content delivery platform for LexisNexis** leveraged across five countries. Received Excellence award in product quality from Infosys Global CEO, and earned a Best Software Engineer award among 1,800 peers in business unit.

EDUCATION

UNIVERSITY OF MICHIGAN, Ann Arbor, Michigan
Master of Business Administration, Strategy and Operations, 2012

UNIVERSITY OF DELHI, New Delhi, India
Bachelor of Information Technology (Engineering), Internet Technologies, 2002
